Description			
rgw : support size suffixes for --max-size in radosgw-admin command			
<pre># radosgw-admin --help usage: radosgw-admin <cmd> [options...] [...]</pre>			
Quota options:			
<pre>--bucket specified bucket for quota command --max-objects specify max objects (negative value to disable) --max-size specify max size (in bytes, negative value to disable) <----- --quota-scope scope of quota (bucket, user)</pre>			
- Currently `--max-size` only takes size in bytes.
