Backport:	jewel	ceph-qa-suite:	
Regression:	No	Pull request ID:	
Severity:	3 - minor		
Description			
when RGWPeriodPuller::pull() is called repeatedly (as in RGWPeriodHistory), the period argument is being reused without clearing its epoch field. RGWPeriod::init() was then failing to read the new period id with the old epoch, and then trying to fetch that period from itself (the metadata master zone)
