This is in the plans after the new sepia hardware is in place; current sepia re-install is too slow & painful to dare to use debs, and with debs we really need to reinstall machines all the time to have a known baseline.

Sorry comment #2 was meant for another bug.

- Status changed from New to Resolved

Basic teuthology task is done in 38f6a78c71910a39b7f1890316c0a134ced8b0ec. Making a gitbuilder for qemu seems less important for now, since we have yet to see regressions caused by qemu, so I pushed that into #2644.
