Description

Background: installed ceph-mgr package on CentOS 7 lacks dependencies to get ceph-mgr modules running.

See: https://github.com/ceph/ceph-ansible/pull/1377#issuecomment-289793577

History

#1 - 03/28/2017 04:16 PM - Tim Serong

There was a bit of discussion on exactly how to handle dependencies for mgr modules in https://github.com/ceph/ceph/pull/13725. For the rest module specifically, I think it's worth considering packaging that as ceph-mgr-rest (or similar), and adding the django and djangorestframework dependencies there, rather than to the ceph-mgr package. Also note that unless something's changed that I'm not aware of, the rest module works with django versions between approximately 1.5 and 1.8, but probably not with newer django versions (I'm not sure what's available on CentOS 7).

#2 - 03/28/2017 09:07 PM - John Spray

- Subject changed from mgr: add django packaging support to ceph-mgr to mgr: add django packaging for ceph-mgr rest module
