Description

Hi Team,
I need support is it possible in ceph.
I created one Bucket for S3 user and the user upload some files the files are stored in the Flash Pool.
i want to write a policy for that Bucket what ever the files was not used from Last 90 days it should automatically move from Flash Pool to SAS OR SATA Pool.And is any usage on that file it should be re migrate to the Flash pool.

Is it possible in CEPH we can write any policy for above.
