fs - Cleanup #36075

qa: remove knfs site from future releases

09/18/2018 08:48 PM - Yuri Weinstein

Status:	Resolved	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	Yuri Weinstein	**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:	v14.0.0		
Tags:		**Component(FS):**	qa-suite
Backport:	mimic,luminous	**Labels (FS):**	qa, task(easy)
Reviewed:		**Pull request ID:**	
Affected Versions:			

Description

`luminous`, `mimic` etc

IRC discussion:

```
2018-09-18 13:33:48 yuriw    knfs seem to be  an orphan
2018-09-18 13:33:49 yuriw    who should be an owner of it ? or maybe we need to remove it from runs
 ?
2018-09-18 13:34:10 yuriw    sage joshd gregsfortytwo ^
2018-09-18 13:34:11 gregsfortytwo   poor batrick
2018-09-18 13:34:17 gregsfortytwo   is it failing?
2018-09-18 13:34:17 <-- med (~medberry@00012b50.user.oftc.net) has quit
2018-09-18 13:35:45 yuriw    http://tracker.ceph.com/issues/35972#note-1
2018-09-18 13:36:18 yuriw    vs http://tracker.ceph.com/issues/24981#note-2
2018-09-18 13:37:24 gregsfortytwo   hmm well the MDS_SLOW_METADATA_IO is almost certainly just a m
issing log whitelist
2018-09-18 13:38:06 gregsfortytwo   not sure about the kernel_untar_build.sh but that should get f
ixed
2018-09-18 13:38:16 gregsfortytwo   ...and it looks like a missing target or something
2018-09-18 13:38:20 gregsfortytwo   it's at least not a Ceph error
2018-09-18 13:38:30 gregsfortytwo   maybe they want to kill the knfs suite but last I heard it cov
ered some interesting bits
2018-09-18 13:38:32 batrick knfs isn't even a sensical configuration
2018-09-18 13:38:37 batrick i'm not even sure why we're testing it
2018-09-18 13:39:58 gregsfortytwo   way to check we satisfy kernel interfaces properly?
2018-09-18 13:40:16 gregsfortytwo   a simple and pretty high-performance nfs server people can use
 in limited configurations?
2018-09-18 13:40:36 gregsfortytwo   there are a ton of good nfs tests that we can inherit from che
aply?
2018-09-18 13:40:43  *  gregsfortytwo doesn't know if these reasons really apply or not
2018-09-18 13:41:18 batrick which kernel interface? that nfs server can run on kclient? not sure w
hy we care
2018-09-18 13:42:31 batrick that "limited configuration" is a slippery slope IMO
2018-09-18 13:42:49 batrick I'm aware some people who shall not be named are using multiple knfs s
ervers on top of cephfs
2018-09-18 13:42:52 batrick which is a big nono
2018-09-18 13:43:54 batrick anyway
2018-09-18 13:44:04 batrick My opinion is that it should be archived.
2018-09-18 13:44:20 gregsfortytwo   yeah I can't find any discussion about it so maybe this was ju
st a thing we did once that should be shelved
2018-09-18 13:45:27 yuriw    copy let's use it as working assumption for 13.2.2 and see how it'll f
ly
2018-09-18 13:46:23 batrick yuriw: Hwo about make a PR against master that deletes qa/suites/knfs
2018-09-18 13:46:30 batrick with a tracker ticket
2018-09-18 13:46:34 batrick and we'll shepherd that through
2018-09-18 13:46:43 yuriw    sure
```

History

#1 - 09/18/2018 08:49 PM - Patrick Donnelly

- Tracker changed from Bug to Cleanup

- Project changed from ceph-qa-suite to fs

- Subject changed from removed knfs site from future releases to remove knfs site from future releases

- Status changed from New to In Progress

- Target version set to v14.0.0

- Backport set to mimic,luminous

- Affected Versions deleted (v12.2.9, v13.2.2)

- Component(FS) qa-suite added

- Labels (FS) qa, task(easy) added

#2 - 09/18/2018 08:50 PM - Patrick Donnelly

- Description updated
