Description			
As soon as https://github.com/ceph/ceph/pull/25456 will be merged, more information will be provided for the config options than before. The 'services' has been added for many config options. We can make use of it in the config editor and filter the sections by the 'services' field (if available).			

History

#1 - 02/26/2019 02:55 PM - Tatjana Dehler

As discussed on <https://github.com/ceph/ceph/pull/25456#issuecomment-447864819> the 'services' field is not the right way to filter out relevant sections for a config option.

Is there any other way to get information about the relevant sections for a config option?
