Reviewed:			
Description http://www.ceph.com/docs/master/install/manual-deployment/ link for fedora needs update, some of the steps listed should be run as sudo (steps 9 , 13) also at step 14, config file should include the [mon] section , It might need other updates as well (disable firewall for fedora, it does exist in other links)			

History

#1 - 02/12/2015 08:43 PM - Dan Mick

- Project changed from teuthology to Ceph

#2 - 01/10/2020 10:22 PM - Zac Dover

- Status changed from New to Closed

This bug has been judged too old to fix. This is because either it is either 1) raised against a version of Ceph prior to Luminous, or 2) just really old, and untouched for so long that it is unlikely nowadays to represent a live documentation concern.

If you think that the closing of this bug is an error, raise another bug of a similar kind. If you think that the matter requires urgent attention, please let Zac Dover know at zac.dover@gmail.com.
