

devops - Bug #11955

/sbin/mkcephfs is not packaged on Firefly / CentOS 6

06/10/2015 09:41 PM - Ken Dreyer

Description https://github.com/ceph/ceph/commit/efbca0465c2946e113771966df08cf7cf37b1196 added mkcephfs to the files listing, but this path is only correct for CentOS 7. In CentOS 6, it's installed to /sbin/mkcephfs instead. This causes rpmbuild to fail to build the tip of the firefly branch on EL6.

History

#1 - 06/10/2015 09:56 PM - Ken Dreyer

- Status changed from In Progress to Fix Under Review

Firefly PR: <https://github.com/ceph/ceph/pull/4924>

Please note that this issue only affects Firefly, because mkcephfs is not present in Hammer and above.

#2 - 06/10/2015 10:03 PM - Yuri Weinstein

Is this related to [#11922](#) ?

Quite possibly! I was wondering why the CentOS 6 gitbuilder didn't catch this until now :) Maybe it did, and I didn't know where to look.

#4 - 06/10/2015 10:07 PM - Ken Dreyer

- Status changed from Fix Under Review to Resolved

Sage has merged the above PR just now, so this fix will be in the next Firefly release, v0.80.10.

#5 - 06/10/2015 10:40 PM - Ken Dreyer

To clarify - this fix is not needed in Hammer, master, or anywhere else. Just firefly.

#6 - 06/10/2015 10:48 PM - Loïc Dachary

- *Release set to firefly*
