<b>Reviewed:</b>	
<b>Description</b> The conditional currently says: <pre>%if 0%{?rhel} &gt;= 7    0%{?fedora} /usr/lib/udev/rules.d/50-rbd.rules %else /lib/udev/rules.d/50-rbd.rules %endif</pre> <p>which on SUSE/openSUSE has the effect of putting 50-rbd.rules in /lib/udev/rules.d, regardless of distro version.</p> <p>The conditional governing the install is similarly inadequate.</p> <p>And the conditionals for the other udev rules files also suffer from the same issue.</p>
