| Description | | | |
| <div>1. some distros need to start rpcbind before</div> <div>2. trying to use nfs while others don't.</div> <div>start_rpcbind: true</div> <p>It seems, on its face, that it should be possible to start rpcbind only if it's not already running and avoid having to configure this per-distro. andrewschoen couldn't remember details when documenting the var, so this task is to determine whether the var is really necessary, or if we can't sense this condition automatically.</p> | | | |
