Description <p>scsi-target-utils depends on librados, but installs it from epel instead of our repository. This causes an issue with the install task because it doesn't install librbid1 as it's already been installed from the epel repo.</p> <p>This causes jobs to fail like this one: http://qa-proxy.ceph.com/teuthology/teuthology-2015-07-15_14:25:24-upgrade:firefly-firefly-distro-basic-vps/974959/teuthology.log</p> <p>We believe the correct solution here is to just not install scsi-target-utils at all. The only suite that uses it is the 'tgt' suite and it doesn't look to be in use. If we decide that we want to start using that suite again then the tgt task should handle installing the dependencies it needs.</p> <p>Related issues:</p> <p>http://tracker.ceph.com/issues/11216 http://tracker.ceph.com/issues/11215</p>
