Description

http://pulpito.ceph.com/teuthology-2015-08-17_23:04:01-fs-master---basic-multi/1020395/

Sadly there are absolutely no daemon logs left, and teuthology.log doesn't even say the client crashed directly, but the caps do go stale and then there is no further progress.

History

#1 - 08/28/2015 12:58 PM - John Spray

I would expect us to see a backtrace from ceph-fuse stderr in the case of an actual crash. Seems more like the client just failed to progress. We can at least avoid hanging the job in this case though

<https://github.com/ceph/ceph-qa-suite/pull/547>

#2 - 08/28/2015 01:02 PM - Greg Farnum

- Status changed from New to Resolved

If we actually see that it's crashing with the timeout we can reopen this.

#3 - 09/04/2015 03:18 PM - Nathan Cutler

- Description updated

- Status changed from Resolved to In Progress

- Target version set to v0.80.11

#4 - 09/04/2015 03:23 PM - Nathan Cutler

- Description updated

- Status changed from In Progress to Resolved

- Target version deleted (v0.80.11)

sorry for clobbering this - restored the state
