

Ceph-deploy - Bug #13847

detect and use full paths for ceph executables

11/20/2015 12:54 PM - Alfredo Deza

Regression: No	Crash signature:
Severity: 3 - minor	
Description	
There are already utilities in ceph-deploy for this and it is generally safer to use them vs. just calling the executable without a full path.

Hi,

should the `system.executable_path` method used also for other executables, like `partx`, `partprobe`, `mkdir`, etc., or only for the ceph executables?

If it's ok I can do such refactoring.

Best,
Martin
