Description

../ceph-erasure-code-corpus/v0.92-988/non-regression.sh lives in a different repo.
So everytime I cleanup, I have to start patching this snippet.

```
index 4cc4331..9627255 100755
--- a/v0.92-988/non-regression.sh
+++ b/v0.92-988/non-regression.sh
@ -22,7 +22,7 @
: ${JERASURE_VARIANTS:=generic sse3 sse4}
: ${MYDIR:=--base $(dirname $0)}
```

```
-TMP=$(mktemp --directory)
+TMP=$(mktemp -d)
trap "rm -fr $TMP" EXIT
```

```
function non_regression() {
```
