

Ceph - Bug #15566

[centos] jewel el7 repos corrupted

04/22/2016 01:25 AM - Vasu Kulkarni

Status:	Resolved	% Done:	0%
Priority:	Urgent	Spent time:	0.00 hour
Assignee:	Alfredo Deza		
Category:	build		
Target version:	v10.2.0		
Source:	Community (user)	Reviewed:	
Tags:		Affected Versions:	
Backport:		ceph-qa-suite:	
Regression:	No	Pull request ID:	
Severity:	3 - minor	Crash signature:	
Description			
This was reported in irc, after trying the flag release=jewel on centos it actually fails with below error			
http://qa-proxy.ceph.com/teuthology/vasu-2016-04-21_17:57:25-ceph-deploy-jewel---basic-vps/143110/teuthology.log

```

History

#1 - 04/22/2016 03:06 AM - Dan Mick

With much less wasted space:

```
[ceph]
name=Ceph packages for $basearch
baseurl=http://download.ceph.com/rpm-jewel/el7/$basearch
enabled=1
```

```
priority=2
gpgcheck=1
type=rpm-md
gpgkey=https://download.ceph.com/keys/release.asc
```

yum install ceph-deploy shows:

Downloading packages:

ceph-deploy-1.5.32-0.noarch.rpm FAILED

<http://download.ceph.com/rpm-jewel/el7/noarch/ceph-deploy-1.5.32-0.noarch.rpm>: [Errno -1] Package does not match intended download.

Suggestion: run yum --enablerepo=ceph-noarch clean metadata

I'm guessing that means repodata.xml doesn't match the actual rpms in checksum or something. verifytree from yum-utils (which I installed on download.ceph.com) shows the rpm checksums are wrong:

```
verifying 1:ceph-10.1.0-0.el7.x86_64 checksum FAILED
  verifying 1:ceph-10.1.1-0.el7.x86_64 checksum FAILED
  .
etc.
```

#2 - 04/22/2016 03:08 AM - Dan Mick

- Project changed from *Ceph-deploy* to *Ceph*

- Subject changed from *[centos] with release=jewel http://download.ceph.com/rpm-jewel/el7/x86_64/ceph-10.2.0-0.el7.x86_64.rpm: [Errno 14] curl#63*

- *"Callback aborted"* to *[centos] jewel el7 repos corrupted*

- Category set to *build*

- Assignee set to *Alfredo Deza*

- Priority changed from *High* to *Urgent*

- Target version set to *v10.2.0*

- Source changed from *other* to *Community (user)*

Discovered by *ibravo* in *#ceph-devel*

#3 - 04/22/2016 03:21 AM - Dan Mick

I tried rerunning createrepo; that made verifytree happy, and also (after yum clean all) made my install of ceph-deploy happy. I'm assuming we just failed to rerun createrepo after signing the packages.

#4 - 04/22/2016 03:21 AM - Dan Mick

- Status changed from *New* to *Fix Under Review*

#5 - 04/22/2016 11:08 AM - Alfredo Deza

That is odd, we do run createrepo after signing. I will double check the process. I need to get some sanity checks before calling the release done. This is not the first time.

#6 - 04/22/2016 06:56 PM - Dan Mick

FWIW, the checksums were invalid in both the noarch and x86_64 repos.

#7 - 04/29/2016 08:46 PM - Vasu Kulkarni

- *Status changed from Fix Under Review to 12*

This has already been fixed, Marking verified.

#8 - 05/06/2016 08:19 AM - Kefu Chai

- *Status changed from 12 to Resolved*
