Backport: jewel	ceph-qa-suite:
Regression: No	Pull request ID:
Severity: 3 - minor	Crash signature:
Description rbd-mirror has a dedicated connection to the remote peer on a per-pool basis. It should also use a dedicated connection to the local peer on a per-pool basis. When the Replayer detects that either the remote or local connection has been blacklisted, it should shut down all its image replayers, re-connect to both clusters, and continue.
