This one's still valid. If a Jenkins builder crashes, for example, the job won't get marked as failed. Perhaps we could add a timeout to shaman to automatically mark a build as failed if 12 hours have passed since a build is "started"

#2 - 08/19/2021 08:28 PM - David Galloway

- Status changed from New to In Progress

I almost got this working but I'm not sure it's going to be possible. It may be better to just have shaman mark a yellow build as failed after 24 hours of no update or something.
