This looks like it needs a change in configuration for the job. The job name in Jenkins is 'ceph-pr-submodules' and it would need to change the values of the 'logrotate' section: <https://github.com/ceph/ceph-build/blob/master/ceph-pr-submodules/config/definitions/ceph-pr-commits.yml#L15-L17>

When we implemented the job we weren't sure what would be OK values for those. If you could submit a PR to the ceph-build repo with values that you may find better suited I would be happy to review/merge.

Thanks

- Status changed from 4 to 12

That sounds like a plan. I'll leave the implementation to someone else but thanks for the offer.

Loic,

I closed the un-reviewed PR a little over a year ago.

I don't see artifacts as getting archived for this job at all but I haven't heard any complaints about it. Any idea if this bug is still valid?
