Description	
<p>We have manually run xfstests against ceph-fuse and kceph before, but apparently don't do so in the nightlies. Jeff recently did it again and found a bunch of bugs.</p> <p>Since xfstests is obviously a major test suite, this is silly and we want to run it. Fix this!</p>	

History

#1 - 01/12/2020 12:30 AM - Patrick Donnelly

- Subject changed from Qa: run xfstests in the nightlies to qa: run xfstests in the nightlies
- Assignee set to Rishabh Dave
- Source set to Development
- Component(FS) qa-suite added
