

mgr - Bug #19954

mgr key needs "mon 'allow *"' caps

05/17/2017 03:14 AM - Tim Serong

Description	
<p>Prior to https://github.com/ceph/ceph/commit/5906e359bd and https://github.com/ceph/ceph/commit/6625fcd8fd, the mgr key had "mon 'allow *"' caps. Since those commits, it only has "mon 'allow profile mgr". This means that mgr modules now can't set config keys, so, for example, the new REST API (https://github.com/ceph/ceph/pull/14457) won't actually be able to persist its settings.</p> <p>Is there a reason the mgr key should have limited mon capabilities, or can we revert those two commits?</p>

- Status changed from New to Resolved

This is handled with the "profile mgr" mon caps now.
