

RADOS - Feature #23045

mon: warn on slow ops in OpTracker

02/19/2018 09:56 PM - Greg Farnum

Status:	Resolved	Start date:	02/19/2018
Priority:	Normal	Due date:	
Assignee:	Chang Liu	% Done:	0%
Category:	Introspection/Control	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Source:		Affected Versions:	
Tags:		Component(RADOS):	Monitor
Backport:		Pull request ID:	
Reviewed:			
Description			
The monitor has an OpTracker now, but it doesn't warn on slow ops the way the MDS or OSD do. We should enable that to detect future issues like #2114 .

I've assigned this to myself but I don't know when I can get to it, so if you want to work on this feel free to take it!

<https://github.com/ceph/ceph/pull/20660>

#3 - 03/01/2018 08:36 AM - Kefu Chai

- Status changed from New to Need Review

#4 - 04/09/2018 09:21 PM - Greg Farnum

- Status changed from Need Review to Resolved

- Assignee changed from Greg Farnum to Chang Liu

That PR got merged a while ago and we've been working through the slow ops warnings that turn up since. Seems to be almost done and going well!
