An attempt at this backport is here: <https://github.com/ceph/ceph/pull/24325>

@smithfarm i think you need to backport 7318826465db8f40317a621058d76a11b8994c40 and 77ec92cc2225db80d55912aca2693de561cdf251 for `SetVal()` helper.

7318826465db8f40317a621058d76a11b8994c40 in particular is non-trivial

We need to discuss if this is worth backporting any more; it may not be but Kefu can probably talk to the right people?
