Description We have currently two versions of DPDK in the source tree: One under: [submodule "src/dpdk"] url = https://github.com/ceph/dpdk And one as part of SPDK: [submodule "src/spdk"] url = https://github.com/ceph/spdk.git Both submodules have different release/commit states: src/dpdk: 2016-12-23 src/spdk/dpdk: 2017-11-17 If there is no specific reason for different versions we could simply remove src/dpdk and use the dpdk under src/spdk/dpdk Any opinions on this?
