<b>Description</b>	
<p>Currently the notification and tasks don't look alike and are not the nicest way to present information as it is often pretty redundant.</p> <p>The idea is the following have 3 kinds of message types.</p> <ol style="list-style-type: none"><li>1. One <code>run*ing*</code> message</li></ol> <pre>Creating ....</pre> <ol style="list-style-type: none"><li>2. One <code>finish*ed*</code> message</li></ol> <pre>Created ...</pre> <ol style="list-style-type: none"><li>3. One <code>*fail*ure</code> message with description</li></ol> <pre>Creation ... failed error description</pre> <p>Currently our messages look like this:</p> <pre>Create ... description message for running/finished and failure</pre>
