Description

Currently the notification and tasks don't look alike and are not the nicest way to present information as it is often pretty redundant.

The idea is the following have 3 kinds of message types.

1. One run*ing* message

```
Creating ....
```

2. One finish*ed* message

```
Created ...
```

3. One *fail*ure message with description

```
Creation ... failed
```

```
error description
```

Currently our messages look like this:

```
Create ...
```

```
description message for running/finished and failure
```
