Backport:			
Description			
The Manager Dashboard currently shows the Cluster Log and Audit Log on the front Dashboard page. To unclutter the front page, I suggest to move this part into a dedicated "Logs" page, located in the "Cluster" menu. If possible, that page should provide some additional functionality to work with the logs, e.g. to search for keywords or to show a certain time range of the logs.

- File dashboard-logs.png added

The screenshot shows the Ceph Manager Dashboard interface. At the top, there's a navigation bar with 'Dashboard', 'Cluster', 'Pool', 'Block', 'Filesystems', and 'Object Gateway'. The main content area is divided into several sections:

- Health:** Overall status: HEALTH_OK
- MONITORS:** 3 (quorum 0, 1, 2)
- OSDS:** 5 (5 up, 5 in)
- METADATA SERVERS:** 1 active, 0 standby
- MANAGER DAEMONS:** active: x
- Usage:** 255 Objects, 11% Raw capacity (5.5 GiB used), Usage by pool.
- Pools:** A table listing pools with their PG status, Usage, Read, and Write counts.
- Logs:** A section with tabs for 'Cluster log' and 'Audit log'. It displays a list of log entries with timestamps and messages, such as 'overall HEALTH_OK' and 'Manager daemon x is now available'.

#3 - 07/06/2018 03:55 PM - Jos Collin

- Assignee set to Diksha Godbole

- Source set to Community (dev)

#4 - 08/20/2018 09:20 AM - Lenz Grimmer

- Blocked by Feature #24573: mgr/dashboard: Provide more "native" dashboard widgets to display live performance data added

#5 - 08/20/2018 09:21 AM - Lenz Grimmer

Please note that work is underway to improve the dashboard landing page (see [#24573](#) for details). This PR will keep the logs on the landing page, please rebase and adapt your PR once this one has been merged.

Please see the screenshot of the new logs page attached. As we have a dedicated page for the logs now, do we still need the tabs?
