- Subject changed from Display performance graphs of a Ceph Pool to mgr/dashboard: Display basic performance/utilization metrics of a Ceph Pool

Would it make sense to use the same widgets that are displayed on the OSD table? With the update of the dashboard landing page and its native widgets ([#24573](#)), we'll drop the "Pools" overview table that is currently displayed there. If possible, that information should be added to the dedicated Pools page.
