Description Currently there is no way to create / delete pool snapshots	

History

#1 - 08/01/2018 09:56 AM - Greg Farnum

I'm not sure we want to add exposure for pool snapshots given our slant against using them in most cases.

#2 - 11/08/2018 04:24 PM - Lenz Grimmer

- Subject changed from *Manage pool snapshots* to *mgr/dashboard: Manage Ceph pool snapshots*

#3 - 02/13/2019 11:16 AM - Lenz Grimmer

- Status changed from *New* to *Rejected*

Resolving as "Rejected" - let's focus on implementing snapshots on the "application layer" instead, e.g. RBD (done) and CephFS (TBD)
