And for this one as well: setting up Ganesha in teuthology, run tests against it? Not using the Ceph shim or anything?  
To what purpose?

Set up ganesha with ceph FSAL module, mount it, run tests against it. We should wait for the linuxbox guys to get the interfaces cleaned up first.

I'm going to suggest that we just close this bug. We're doing this as a matter of course with the current work to clean up FSAL\_CEPH, and the request here is too vague to be of any real use. Please reopen it if there's something specific that needs to be done.

Jeff, fixed the wording to be clear.
