#### Description

With a fresh build docker container I got the following message through **ceph -s** after sourcing **run-backend-api-tests.sh**

```
Module 'restful' has failed dependency: No module named 'werkzeug'
```

After that I found out that only the pip2 version of werkzeug was not installed. After I had installed it and recreated the cluster the message that lead to a warning state disappeared.

#### History

##### #1 - 10/16/2018 09:28 AM - Lenz Grimmer

- Subject changed from Missing requirement vor running the dashboard API tests to Missing requirement "python-werkzeug" for running the dashboard API tests

##### #2 - 10/17/2018 10:47 AM - Ricardo Marques

- Status changed from New to Fix Under Review

##### #3 - 10/23/2018 02:40 PM - Stephan Müller

- Status changed from Fix Under Review to Resolved

##### #4 - 10/23/2018 02:42 PM - Tatjana Dehler

<https://github.com/ceph/ceph/pull/24628>

##### #5 - 04/15/2021 05:21 PM - Ernesto Puerta

- Project changed from mgr to Dashboard

- Category changed from dashboard/general to General
