Description
ceph version 13.2.2 (02899bfda814146b021136e9d8e80eba494e1126) mimic (stable)

We want to see the inodes and client requests graph on the dashboard using multimds but all the graphs stack together.

- Affected Versions v15.0.0 added

Verified on octopus.

Steps to reproduce:

- create a fs, and adjust active mds for it.
e.g.

```
ceph fs set <fs_name> max_mds 2
```

- mount the fs and perform some I/Os
- Open Filesystems page and click the fs, <cd-cephfs-chart> components at the bottom are overlapped.
