Regression:	No	Crash signature (v1):	
Severity:	3 - minor	Crash signature (v2):	
Reviewed:			
Description Currently the key value table will not render all objects in the given object, even if 'renderObjects' is set to true. For example you give it an object with 2 attributes each of them holds a non empty object, this will result in a table data that is not fully converted to key value objects, which will result as text '[Object object]' in the table view.
