<b>Description</b> A helper class for interacting with fixtures would be great. With that we could better separate the "FormHelper" from the fixture usage.

- Copied to Backport #39041: nautilus: mgr/dashboard: FixtureHelper added

#6 - 03/30/2019 08:16 AM - Nathan Cutler

@Stephan - I assume you just want this backported to nautilus. I took the following steps to facilitate that:

1. changed issue type from "Task" to "Feature" (there is no backport tracker for Task, so it should not be used for anything that would require a backport)
2. added "nautilus" to the Backport field
3. ran the backport-create-issue script (obtainable from src/script in master branch) giving it the number of this issue as an argument

It's not strictly necessary for you to create the backport issue yourself. You can just set the status to "Pending Backport" and fill out the Backport field. The "Backports and Stable Releases" team will then take care of creating the backport issues, cherry-picking, etc. But you're of course welcome to do that yourself - just please use the scripts to make the entire process go much quicker and ensure everything is done correctly:

src/script/backport-create-issue  
src/script/ceph-backport.sh

- *Target version set to v15.0.0*

**#8 - 04/09/2019 01:26 PM - Stephan Müller**

@Nathan Thank your for the information. Used the script on the other backports I did.

**#9 - 04/18/2019 08:57 AM - Stephan Müller**

- *Status changed from Pending Backport to Resolved*

**#10 - 04/15/2021 05:25 PM - Ernesto Puerta**

- *Project changed from mgr to Dashboard*

- *Category changed from 151 to Testing & QA*
