Backport:	nautilus, mimic	ceph-qa-suite:	
Regression:	No	Pull request ID:	27242
Severity:	3 - minor		
Description			
if endpoint is specified without a trailing port, we don't seem to set this to the default port. Also specifying port= argument always binds a ipv4 address with the port, so a ipv6 endpoint(without a port) and a port argument will bind a ipv4 with port argument and ipv6 without a port.
