Reviewed:			
Description <p>After back button refactoring, the behaviour of the Back/Cancel button has changed:</p> <ul style="list-style-type: none">- Previously it was based on the Router hierarchy (e.g.: #/pool/create's back led always to #/pool)- Now it uses location.back() method, which relies on the browser history (e.g: #/pool/create is accessed via URL, after clicking Cancel the browser will show the browser home page, not #/pool or any other dashboard page). <p>No matter this is acceptable behaviour or not, it means a change in the way the user browses the dashboard.</p> <p>An alternative to this could be to use existing information provided to the Routing module.</p>

- Tags set to usability, low-hanging-fruit
- Target version deleted (v14.2.0)

#2 - 04/15/2021 04:53 PM - Ernesto Puerta

- Project changed from mgr to Dashboard
- Category changed from 152 to UX

#3 - 05/05/2022 09:23 AM - Seremba Patrick

Hi @Ernesto, just for the sake of clarity, do you want the back button to get back to its behavior before refactoring? Or did I get the issue wrong? Secondly, do you have any hints or pointers on how one can tackle this issue? Thanks a lot.
