- *Target version deleted (v14.2.1)*

Note: "target version" is a little misleading. It's actually the version where the fix will appear, so it's not known until the PR gets merged. (This PR will probably get merged for v14.2.2 - v14.2.1 is already in QE - but even v14.2.2 is not certain right now.)

- *Status changed from In Progress to Resolved*

- *Target version set to v14.2.2*
