## original description

The "rbd" teuthology suite runs a workunit, "qa/workunits/rbd", which covers rbd snapshot creation and rollback, but does not cover the "rbd diff" command at all.

After discussion with Mykola, it would seem beneficial to integrate "rbd diff" into this workunit.

(NOTE: after further discussion with Jason, it was decided to implement the test using the "cram" teuthology task, instead of the rbd workunit.)
