Severity:	3 - minor		

Description

When trying to create an NFS export with a client that doesn't override the "squash" value, I see the following error:

The screenshot shows the Ceph dashboard interface. At the top, there's a navigation bar with 'ceph' logo and various menu items like 'Dashboard', 'Cluster', 'Pools', 'Block', 'NFS', 'Filesystems', and 'Object Gateway'. The 'NFS' menu is selected. Below the navigation, there's a sub-header 'NFS > Add'. The main content area shows an 'NFS export' configuration form with fields for 'Daemons' (set to 'node1'), 'Storage Backend' (set to 'CephFS'), 'CephFS User ID' (set to 'admin'), and 'CephFS Name' (set to 'a'). There's also a checkbox for 'Security Label' which is unchecked. A red error message box is visible in the top right corner of the dashboard, stating: 'Failed to create NFS export: "/>
