**Description**

I’m getting a new mypy error in master:

```
pybind/mgr/volumes/module.py: note: In member "_cmd_fs_subvolumegroup_snapshot_rm" of class "Module":
pybind/mgr/volumes/module.py:552: error: Name 'sub_name' is not defined
```

Regression of [https://github.com/ceph/ceph/pull/27594](https://github.com/ceph/ceph/pull/27594)

**Related issues:**

Copied to CephFS - Backport #40338: nautilus: mgr/volumes: Name 'sub_name' is...

## History

### #1 - 06/05/2019 12:24 PM - Ramana Raja
- Project changed from mgr to CephFS
- Component(FS) mgr/volumes added

### #2 - 06/05/2019 12:41 PM - Ramana Raja
- Status changed from New to Fix Under Review
- Pull request ID set to 28407

### #3 - 06/06/2019 12:30 PM - Venky Shankar

Ramana, I think we should just mention that this issue will be fixed w/ subvolume refactor and mark as resolved once that's merged?

It seems a bit odd (to me) mentioning this tracker in one of the commits in the refactor pr (as I do not want to have a separate commit just for this).

### #4 - 06/11/2019 04:52 PM - Ramana Raja

It seems a bit odd (to me) mentioning this tracker in one of the commits in the refactor pr (as I do not want to have a separate commit just for this).
I didn't expect that you create a separate commit, but just add 'Fixes: <tracker link>' to the commit message of the commit that fixes the issue. But if you think this is odd, I guess it's OK as long as the issue gets fixed in master and nautilus.

yeh -- don't want to just add 'Fixes' the commit does much more than that...
