Lifecycle rule shouldn't contain deletemarker or multipart expiration if it has tags.

AbortIncompleteMultipartUpload or ExpiredObjectDeleteMarker can't be specified with Tags in S3 lifecycle configuration.

com.amazonaws.services.s3.model.AmazonS3Exception: AbortIncompleteMultipartUpload cannot be specified with Tags. (Service: Amazon S3; Status Code: 400; Error Code: InvalidRequest;)

com.amazonaws.services.s3.model.AmazonS3Exception: ExpiredObjectDeleteMarker cannot be specified with Tags. (Service: Amazon S3; Status Code: 400; Error Code: InvalidRequest)
