

RADOS - Bug #42113

ceph -h usage should indicate CephChoices --name= is sometime required

10/01/2019 09:25 PM - Sage Weil

- Tags set to low-hanging-fruit

#2 - 10/02/2019 09:04 PM - Greg Farnum

- Priority changed from High to Normal

No failures so this is normal priority?

#3 - 10/22/2019 02:19 AM - Matthew Oliver

Can't seem to assign this to myself. But I have the first version of the patch coming.

#4 - 10/22/2019 03:01 AM - Kefu Chai

- Status changed from 12 to Fix Under Review

- Pull request ID set to 31042

@Matthew thanks for your contribution! the reason why you could not assign this ticket is that you are not listed in "Developer" of Ceph project, see <https://tracker.ceph.com/projects/ceph> .

**#5 - 10/22/2019 10:38 AM - Sebastian Wagner**

- Duplicated by Bug #40801: ceph orchestrator cli alleges support for json-pretty, xml, xml-pretty formats added

**#6 - 10/22/2019 10:38 AM - Sebastian Wagner**

Marked [#40801](#) as duplicate. Actually [#40801](#) was first, but got little attention.

**#7 - 10/22/2019 10:13 PM - Matthew Oliver**

From what I can see [#40801](#) is slightly different. In that if you do send an '--format=non-existent-format' it will then give you format options that aren't supported, or if they are not mentioned in the 'help'.

I'll try and address both in the same patch (or is that too much scope creep?)

**#8 - 10/23/2019 02:19 AM - Matthew Oliver**

Seems the full list is more prevalent and may be coming from outside the python code. The full -f list is in the '--help'. So suddenly isn't as such an obvious fix. But if we want to add them both together, I'll continue down the rabbit hole. (as at least it helps teach me to navigate different parts of the codebase) :P
