

mgr - Bug #42939

MgrMonitor: blacklist previous instance of ceph-mgr during failover

11/21/2019 07:59 PM - Patrick Donnelly

Status: Resolved	% Done: 0%
Priority: High	
Assignee: Patrick Donnelly	
Category:	
Target version: v15.0.0	
Source: Development	Reviewed:
Tags:	Affected Versions:
Backport: nautilus	ceph-qa-suite:
Regression: No	Pull request ID: 31797
Severity: 3 - minor	Crash signature:
Description This wasn't realized as necessary early on in the ceph-mgr development because the mgr didn't interact with RADOS. However, now it is becoming common for plugins to store data there. It's important that the previous instance can no longer interact with RADOS while the new mgr takes over. See also discussion here: https://github.com/ceph/ceph/pull/31746
