Backport:	octopus nautilus	**Pull request ID:**	32829
Regression:	No	**Crash signature (v1):**	
Severity:	3 - minor	**Crash signature (v2):**	
Reviewed:			

Description

If a pool is created with a wrong rule that is oversized for the cluster it gets into the "creating+incomplete" state.
This wont break the dashboard yet, but when clicking on the pool to get it's details every API request will be left unanswerd. The first unanswered call is "/api/pool/$badPool/configuration".

To reproduce this you can create an erasure code profile with a greater value for k than you have OSDs.
