Regression:	No	Pull request ID:	33612
Severity:	3 - minor	Crash signature:	
Description			
We are trying to create new RGW user belonging to Tenant.			
When we specify Maximum Bucket field value as 0, it is getting interpreted as unlimited due to which new user belonging to existing tenants are able to create unlimited buckets.			
As per Ceph documentation in order to disable the bucket creation for new users, we will need to set the max number of buckets for a user to a negative value. However, Ceph dashboard has a validation for +ve values only. When we tried setting negative value (-1) in Maximum Bucket field, it gives error as "The entered value must be >= 0."
