

Orchestrator - Bug #44598

cephadm: Traceback, if Python 3 is not installed on remote host

03/13/2020 04:11 PM - Sebastian Wagner

Status:	Resolved	% Done:	0%
Priority:	High		
Assignee:	Daniel Pivonka		
Category:	cephadm		
Target version:	v15.2.2		
Source:		Reviewed:	
Tags:		Affected Versions:	
Backport:		ceph-qa-suite:	
Regression:	No	Pull request ID:	34250
Severity:	3 - minor	Crash signature:	
Description			
Adding a host:			
if python3 isn't on the target, you get a traceback with OSError: cannot send(already closed?) error which is not helpful. It's only in the mgr log you see			
<pre>"[cephadm ERROR root@hostname] Can't communicate with remote host, possibly because python3 is not installed there"</pre>			
- which is not helpful to new users
