Description			
<p>Currently it is possible send push notification unauthenticated to the dashboard and the push notifications are not verified if they actually are coming from an Alertmanager instance.</p> <p>To see whats configurable see https://prometheus.io/docs/alerting/configuration/#http_config</p> <p>Removing the endpoint is not a solution to be considered as ceph orchestrator is configuring every Alertmanager instance to talk to the receiver of the dashboard.</p> <p>The receiver is at the moment the only part that can handle multiple Alertmanager instances.</p>			

History

#1 - 04/15/2021 04:53 PM - Ernesto Puerta

- Project changed from mgr to Dashboard
- Category changed from 146 to General - Back-end
