Severity:	3 - minor	**Crash signature:**	

Description

http://pulpito.ceph.com/swagner-2020-06-25_08:07:18-rados:cephadm-wip-swagner-testing-2020-06-24-1032-distro-basic-smithi/

If the upgrade fails, the test run hangs indefinitely:

```
INFO:cephadm:Using recent ceph image docker.io/ceph/ceph:v15.2.0
{
    "target_image": "quay.io/ceph-ci/ceph:4c17bddcef39d3df83a6ab939ac631ad6c600445",
    "in_progress": true,
    "services_complete": [],
    "message": "Error: UPGRADE_FAILED_PULL: Upgrade: failed to pull target image"
}
```

Things to do here

- add a status entry to the upgrade status dict
- set it to "error"
- Make sure, the upgrade tests fails, if we encounter an error.

History

#1 - 07/22/2020 10:55 AM - Sebastian Wagner

- Subject changed from cephadm upgrade: fail if upgrade status is set to error to cephadm upgrade test: fail if upgrade status is set to error
