

Dashboard - Tasks #47230

mgr/dashboard: Move HACKING.rst into the main documentation

09/01/2020 10:27 AM - Lenz Grimmer

Status: Resolved	% Done: 0%
Priority: Normal	
Assignee: Zac Dover	
Category: Docs	
Target version: v16.0.0	
Tags:	Affected Versions:
Reviewed:	Pull request ID: 37070
Description	
<p>The file <code>src/pybind/mgr/dashboard/HACKING.rst</code> in the git repository contains instructions on how to set up a Dashboard development environment and how to get started with development.</p> <p>It has grown significantly in size of scope and has become an invaluable resource for new joiners. However, it's current location deeply nested in the git repository makes it hard to find and it's not searchable. To give this document more exposure, the content should be moved into the Ceph Documentation (which contains other developer-oriented documentation already).</p> <p>Since it's already written in reStructuredText markup language, the transition should be fairly straightforward. The content of the actual <code>HACKING.rst</code> file should then be replaced with a pointer to the documentation. Any other references to the file should also be updated accordingly, e.g. the <code>README.rst</code> file in the dashboard source directory.</p>

- Assignee set to Zac Dover

Simply moving `HACKING.rst` to the developer guide directory `/ceph/doc/dev/developer_guide` and adding a link to the `.rst` file causes `/ceph/admin/.build` to throw a crazy error that I'm not going to paste in here just yet, so this might turn out to be trickier than we thought. At the moment, it's beyond my art.

#3 - 09/07/2020 08:54 AM - Zac Dover

The time has come to post the error thrown when trying to build a document containing the raw `HACKING.rst`:

```
zdoover@zdoover-ThinkPad-T530:~/Documents/ceph/admin$ ./build-doc

#5 - 09/08/2020 09:04 AM - Zac Dover

- File `sphinx-err-npo22ybr.log` added

I've tried this on a second computer, under different circumstances, and I have gotten the same error.

More troublingly, I can no longer build from my master branch.

I'm attaching the error log.

#6 - 09/08/2020 12:21 PM - Zac Dover

Following Sebastian Weimer's advice, I did the following:

```
zdover@zdover-ThinkPad-T530:~/Documents/ceph/admin$ git checkout e4e6e9c
M src/spdk
Note: checking out 'e4e6e9c'.
```

You are in 'detached HEAD' state. You can look around, make experimental changes and commit them, and you can discard any commits you make in this state without impacting any branches by performing another checkout.

If you want to create a new branch to retain commits you create, you may do so (now or later) by using `-b` with the checkout command again. Example:

```
git checkout -b <new-branch-name>;
```

HEAD is now at e4e6e9c738 Merge pull request #36915 from yuriw/wip-yuriw-46529-master

But it failed in a similar way. I'll attach the Sphinx error log to this message so that we can track this issue, which started out a task but became in the chrysalis of my git repo became a bug.

#7 - 09/08/2020 12:59 PM - Kefu Chai

might be <https://github.com/sphinx-doc/sphinx/issues/7740>, but i cannot reproduce this issue. so cannot bisect the offending commit.

#8 - 09/08/2020 01:32 PM - Zac Dover

And at last, I got the clean master to build by running the following command (courtesy of Sebastian W, of course):

```
zdover@zdover-ThinkPad-T530:~/Documents/ceph/admin$ git checkout f144e5e76a1353e60bc46cc7b52fd44cab54ba48^C
```
