

Orchestrator - Bug #48930

when removing the iscsi service, the gateway config object remains

01/20/2021 12:10 AM - Paul Cuzner

| Description When the first rbd-target-api daemon starts it creates a gateway.conf object. When the iscsi service is removed via "orch rm", this object remains in the pool and in theory could be used erroneously by a subsequent iscsi deployment. | |

who's creating the gateway.conf object? I can't find it in <https://github.com/ceph/ceph/blob/master/src/pybind/mgr/cephadm/services/iscsi.py>

you can get it directly from CLI with:

```
1. rados -p iscsi ls
```

#6 - 02/16/2021 05:27 PM - Sebastian Wagner

but who is creating the object in the first place?

#7 - 02/17/2021 11:25 AM - Sebastian Wagner

this needs to be implemented in on of the methods here for iscsi:

<https://github.com/ceph/ceph/blob/9bdc3b9f6fad2b362e04e69d5cb92995af90ace1/src/pybind/mgr/cephadm/services/cephadmervice.py#L287-L297>
